

HCAHPS Patient Analysis Project

Business Requirement Document

Prepared By

Neha Pandey

Submission Date

6 August 2026

1. Business Requirements

- Analyze HCAHPS patient satisfaction survey data.
- Compare patient satisfaction across states and regions.
- Compare state performance with national averages.
- Identify healthcare quality measures that need improvement.
- Monitor patient experience over different reporting periods.
- Support data-driven healthcare decisions.

2. Functional Requirements

- Import all project datasets into Power BI.
- Create relationships between all tables.
- Build KPIs using DAX measures.
- Create interactive charts, maps, and KPI cards.
- Add slicers for report period, state, and measure.
- Enable drill-down and filtering for detailed analysis.

3. Dashboard Requirements

- Display overall patient satisfaction KPIs.
- Show state-wise performance.
- Compare national and state results.
- Display measure-wise performance.
- Show trends across reporting periods.
- Provide interactive filters and slicers.
- Design a clean and user-friendly dashboard.

4. User Stories

User	Requirement
Chief Executive Officer (CEO)	Wants a national patient satisfaction overview.
Chief Quality Officer	Wants measure-wise performance analysis.
Regional Managers	Want state and region comparisons.
Policy Team	Wants year-over-year trend analysis.
Hospital Accreditation Team	Wants benchmarking against national averages.
